The Client

Bridges Electrical Engineering Ltd.

Bridges Electrical Engineers Ltd. is a **highly regarded** MEICA (Mechanical, Electrical, Instrumentation, Control and Automation) **engineering technology company** that offers comprehensive in-house design, manufacture, and installation services.

With a rich history dating back to the early 70s as a family business, they have **continuously pushed the boundaries to deliver innovative solutions while maintaining strong connections** with their clients.

Today, Bridges Electrical Engineers Ltd. **collaborates with various commercial and industrial clients** operating in the water treatment, quarrying, nuclear, and waste recycling sectors.

The leading electrical engineering firm **recently cemented its position as an industry leader by being named in The Sunday Times Best Places to Work 2024**. Bridges Electrical Engineers Ltd. remains dedicated to delivering exceptional services and prioritising the well-being of its clients in every aspect of its operations.

Strategic Roadmap

In the past, Bridges Electrical Engineers Ltd. faced numerous challenges due to unreliable server infrastructure and limited access to crucial files across multiple branches. This not only hindered their day-to-day operations but also created barriers to productivity and collaboration.

Additionally, the lack of future IT planning advice left them vulnerable in the rapidly evolving digital landscape, impeding their growth potential and making them susceptible to competitive threats.

The high regulatory compliance requirements further compounded these challenges, making it essential for the company to consistently meet stringent standards and protocols to avoid severe consequences for its reputation and bottom line.

Adam Harling
Managing Director

The Brief

Bridges Electrical Engineers Ltd. needed a robust solution to address their unreliable server infrastructure, ensure seamless access to crucial files across branches, and receive strategic IT planning advice to stay ahead in the competitive landscape.

The solution had to ensure compliance with regulatory standards and provide a future-proof IT infrastructure to support their growth and operational efficiency.

Providing Bridges Electrical Engineering Ltd with an Innovative Solution

Recognising the immense value of partnering with us, Bridges Electrical Engineers Ltd. opted for our co-managed support package. Leveraging our deep-rooted expertise in the manufacturing industry, we provided more than just technical support. We delved into the core of their operations to offer a game-changing IT strategy tailored to their specific needs.

Our comprehensive advice covered every aspect of their operations, ensuring compliance with stringent industry regulations. By embracing our recommendations, Bridges Electrical Engineers Ltd. now boasts a reliable, affordable, and future-proof IT infrastructure that propels their business forward, unlocking new possibilities and potential.

The Result

With the implementation of our co-managed support package, Bridges Electrical Engineers Ltd. **overcame its challenges with server infrastructure and file access across branches.** They **now enjoy uninterrupted operations and enhanced productivity and collaboration.** Our strategic IT planning advice positioned them to **navigate the digital landscape** effectively, **supporting their growth** and safeguarding them against competitive threats. Compliance with regulatory standards has become streamlined across the board, bolstering their reputation and ensuring continued operational success.

Next Steps

Moving forward, Bridges Electrical Engineers Ltd. will continue to benefit from our ongoing support and strategic guidance. We will work closely with them to continuously optimise their IT infrastructure, anticipate future needs, and ensure they remain at the forefront of innovation in their industry.

Our partnership will focus on unlocking further potential, driving growth, and maintaining the exceptional standards Bridges Electrical Engineers Ltd. is known for.

Is Netitude the Right Fit for your business?

Thank you for taking the time to read through this case study, detailing how we set out on a journey with one of our most coveted clients (Bridges Electrical Engineers Ltd.) towards holistic technological success.

With between 250-300 staff there were plenty of challenges and obstacles that were overcome as we set out to achieve the strategic roadmap we put in place for a highly regarded and reputable engineering technology company.

We're very proud of the relationship we've garnered with Bridges and can't wait to keep steering them through the fourth industrial revolution (4IR / Industry 4.0) in the weeks, months and years to come.

If you need an award-winning UK-based Managed Service Provider (MSP) who will keep your business ticking technologically, visit our website and contact our team of experts today!
